Software Developer

Dear Recruiter,

I am writing to express my interest in the back-end developer position at your company in response to the job posting on your platforms.

Following a strong background in control and automation engineering, I recently made the decision to transition into the field of software development, with a specific focus on back-end. This decision was driven by my passion for programming and the desire to apply my skills to software development.

I have gained significant experience in this area through various personal projects hosted on GitHub.

My key skills include:

- JavaScript and Node.js
- Design and development of REST APIs
- Advanced use of Git for version control
- Knowledge of databases, including SQL and PostgreSQL
- Teamwork and leadership
- Creative problem-solving
- Programming logic and problem-solving

I am confident that my engineering background, combined with my development skills, will allow me to make a meaningful contribution to your company's development projects. I believe my ability to work in teams, creativity, and problem-solving skills will be valuable assets to your company.

I am excited about the opportunity to join an innovative company like yours and apply my technical skills and constant desire for learning. I am ready to embrace this new challenge with dedication.

Thank you for considering my application, and I would be happy to discuss further details during an interview. I am available for a conversation at your convenience.

Sincerely,

Michée Celestin
